Simple. Smart. Versatile.

Introducing Securespec

For years, traditional deadbolt locks have been the only way to control access. Now, modern door technologies and smart capabilities are paving a new pathway and delivering many advantages.

Our Securespec range of solutions combine the best in modern technology, with style and convenience to form a transformative access control solution that creates safe, secure environments.

Our dedicated technical team have the experience and expertise to provide you with a functional and easy to install solution that meets all your requirements.

From hospitals, schools and universities, hotels, and commercial enterprises, the Securespec range provides an ideal

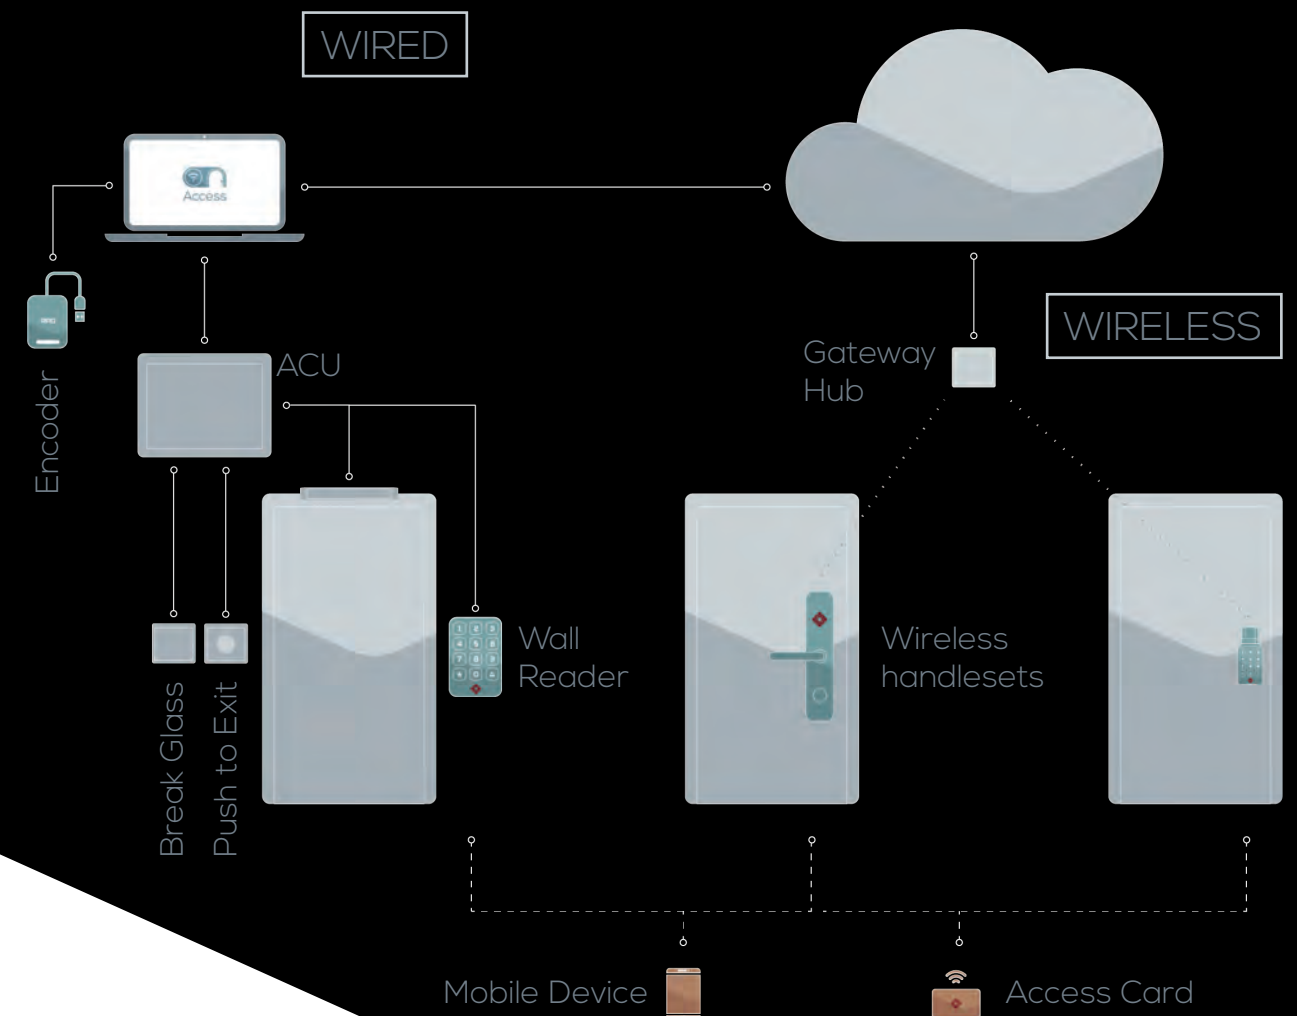

smart solution for anywhere there is a requirement to protect people, assets and property with a simple yet versatile access control solution.

Part of a complete solution

Lloyd Worrall has been supplying the building industry with high quality architectural hardware since 1946, delivering superior value through their extensive knowledge and expertise.

Alongside a comprehensive range of ironmongery solutions, doorsets, handrails and balustrades, the introduction of the Securespec range offers the complete solution from a single, trusted source.

- Advanced functionality included as standard
- Swift installation and configuration
- Complete product portfolio for the door
- Superior value through expertise and advice
- Cost effective solution

Access control solutions from the door experts

From single doorsets to fully integrated online multi-door and multi-user systems, the Securespec range of products incorporates advanced features and secure technologies as standard. With the support of our specialist technical consultants, Lloyd Worrall can provide a simple, convenient yet comprehensive solution - without compromise.

Powered by iTEC

Securespec from Lloyd Worrall is powered by iTEC, a leading international company, recognised for the quality and diversity of products and solutions offered in access control.

Hotels & Leisure

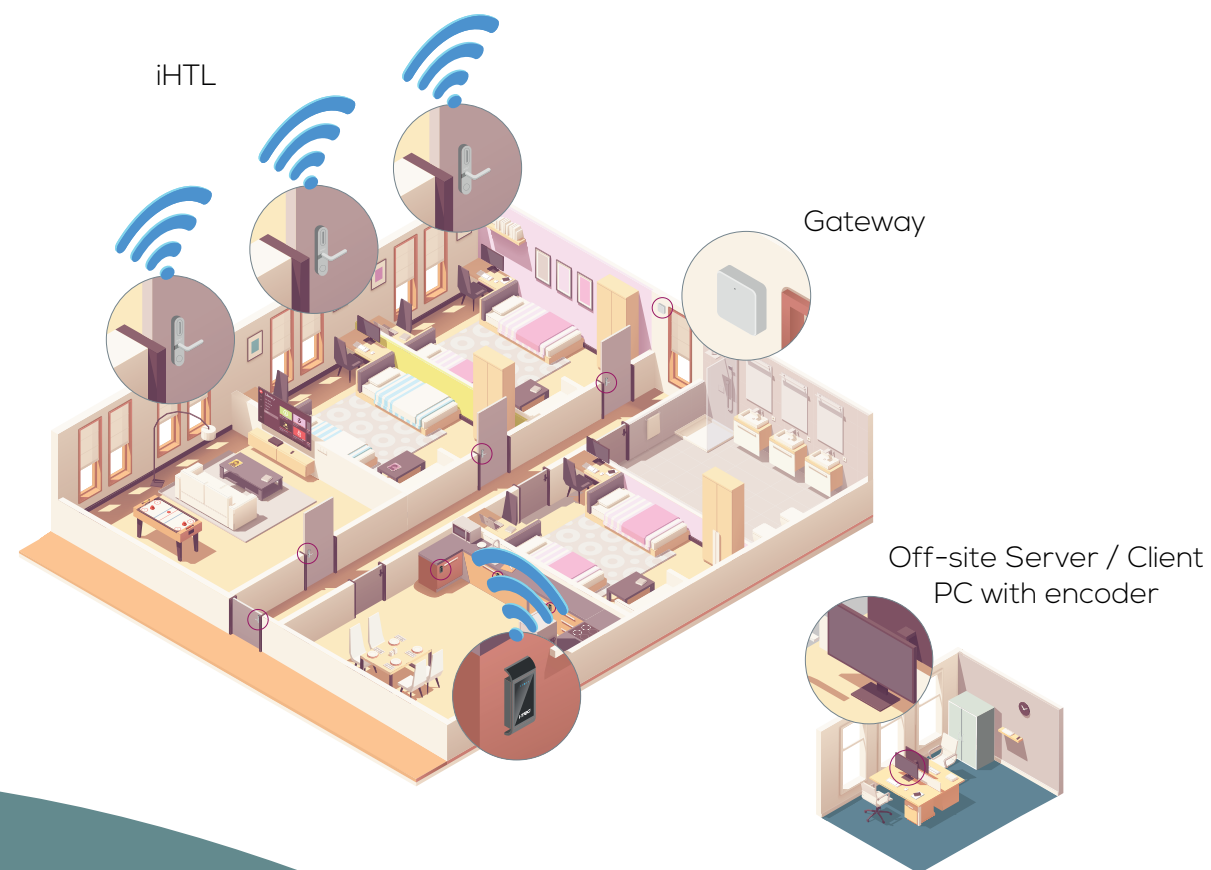

Student accommodation | Care homes
High quality residential

As smart home living is gaining popularity, facilities managers are seeking solutions that provide enhanced security and seamless access, without the hassle of multiple keys. This is especially true in shared accommodation where privacy and security is important.

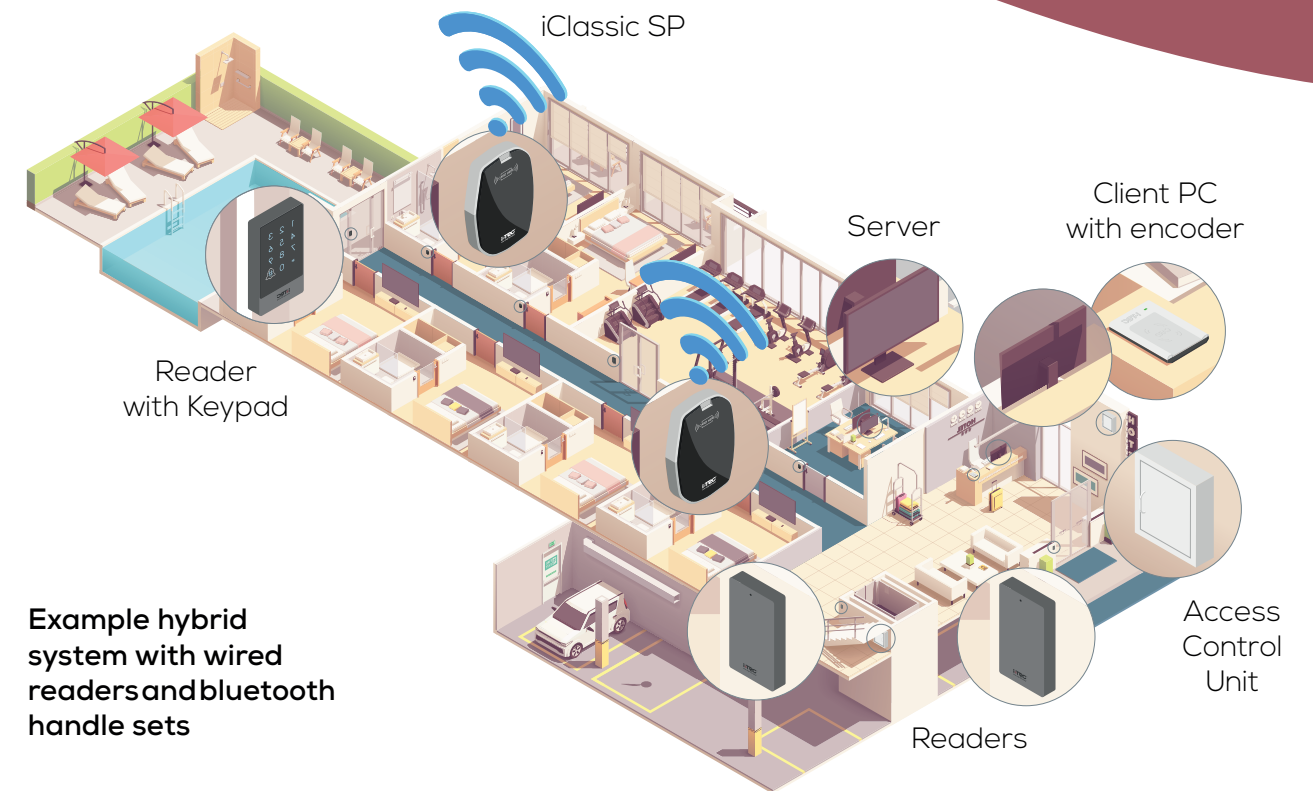

From front doors to perimeter access, shared spaces, and lifts, Securespec solutions combine security and style, with centralised management – perfect for a variety of residential applications.

The Securespec range of smart access control solutions provide a stylish, functional, and easy to install locking system, that offers enhanced security and peace of mind, for users, operators and managers alike.

Residential

Example hybrid system with wired readers and bluetooth handle sets

Providing a service in the hotel or leisure sector is all about ensuring a positive customer experience – this includes swift yet secure access for those who need it.

A fully-featured access control system not only gives security, but also enhances this experience by offering another level of convenience. This means that guests have the assurance that their items are secure, whilst staff can access the areas they need to, when they need to.

The system also offers centralised management so access can be managed with minimal time, input and hassle for all.

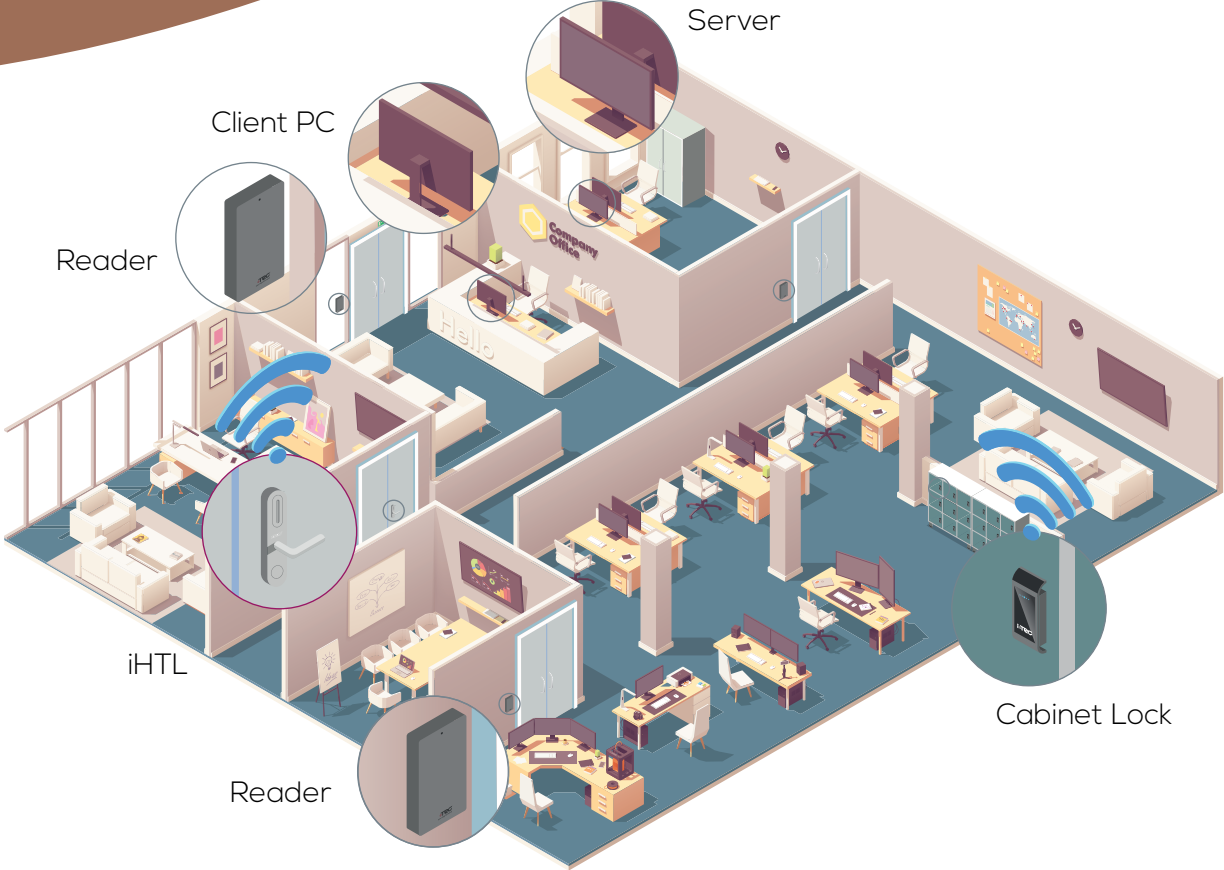

For a seamless experience that provides added value, Securespec, offers a quick, easy, and efficient access control solution.

Boutique hotels | Leisure centres
Gymnasiums | Entertainment complexes

Commercial Spaces

Offices | Warehouses | Retail

Suitable for a range of applications, our access control systems protect data, assets, and people, by managing who can enter or leave each area.

Designed to work seamlessly throughout offices of all types and sizes, Securespec solutions provide the appropriate level of security for your needs. The range of products can be deployed across a variety of premises including offices, retail spaces and warehouses.

We understand that no two buildings or security requirements are the same, so our expert team will work with you to develop an access control system that is specifically designed to suit your needs - whatever the challenge.

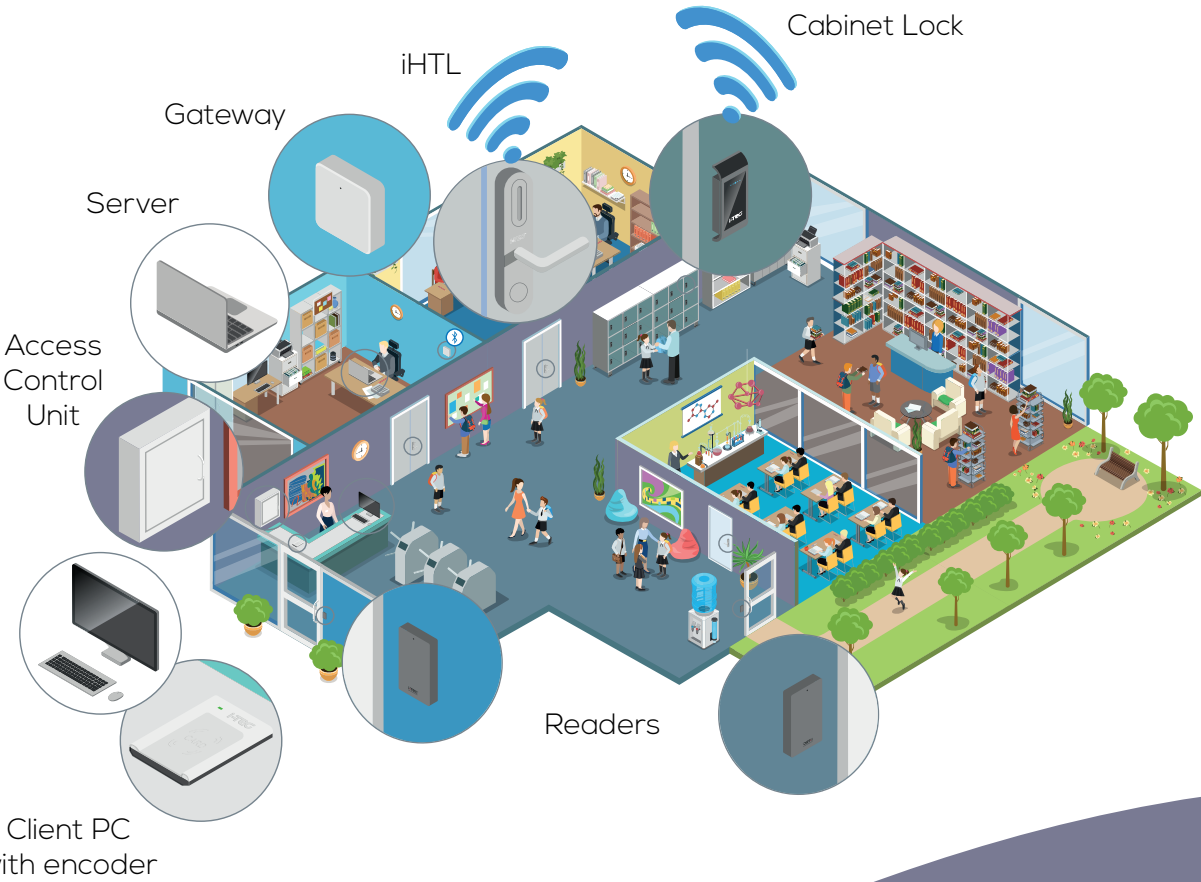

Primary | Secondary | Higher education

Security in schools and educational settings is of paramount importance, but can also be a complex task. Whether it's a primary school, or a multi-site university, efficient and reliable security is required to ensure students, staff and visitors feel safe and secure.

Each building comes with different objectives and constraints. However, Securespec provides comprehensive security and access management that can be tailored to any educational institution, regardless of size or location.

Our expert tech team will work with you to design, implement, and maintain a suitable, integrated security system that ensures your facility remains a safe space.

Education

Simple. Smart. Software.

Simple, yet sophisticated.

With our state-of-the-art access control software, powered by iTEC OnAccessPro you can deliver seamless access control and better experiences for users, residents, and visitors.

Once the access control system has been installed, all doors controlled by the system will automatically lock when the door closes. Anyone without an access token is therefore unable to enter. If required, doors can be set to remain open with designated time frames or provide flexible control around user access rights.

Access can be restricted by time, days, or areas – only granting access when required.

With the iTEC OnAccessPro app, or via a web browser, you have the freedom to decide who will have access to defined spaces, as well as when.

Compatible with electronic cylinders, locks, keypads, and other devices, you can access your terminals locally via Bluetooth, or via the internet using the peripheral gateway.

Whether you want to create, change, or delete users and accesses, you can do so at the click of a button – no matter where you are in the world.

- Configure a range of credentials including access cards and mobile phone
- Manage and monitor your system from on-site or anywhere in the world
- Custom configuration of access groups
- Swiftly issue new credentials from wherever you are
- Manage temporary users conveniently and securely with check-in and check-out
